A COMPLETE SOLUTION - A COMPLETE LIFE CYCLE

FORGING PARTS AND SINTER

By drop forging steel and machining, we make forging parts for control mechanisms and gearboxes, supporting parts of chassis, components for drive shafts and sinter forging parts for the most renowned European and global makers of vehicles: VW, Audi, Renault, Dacia, BMW, ZF Lemförder & ZF Lenksysteme, Jtek, GKN, Arvin Meritor, BPW, Schäffler KG, Betek and Cimos. Various certificates, tests and awards for excellence confirm the quality of forging parts made in Unior.

SPECIAL MACHINES

Unior mechanical equipment provides comprehensive solutions, ranging from the concept stage to the finished product. Besides specific CNC machine tools for the serial working of aluminium castings or forging parts, Unior also offers flexible production cells, machines for deep hole drilling, for working ends and for working chassis parts, machines with a rotary table and special purpose machines. Unior is a supplier of machines for renowned car manufacturers such as VW, BMW, Audi, Daimler etc.

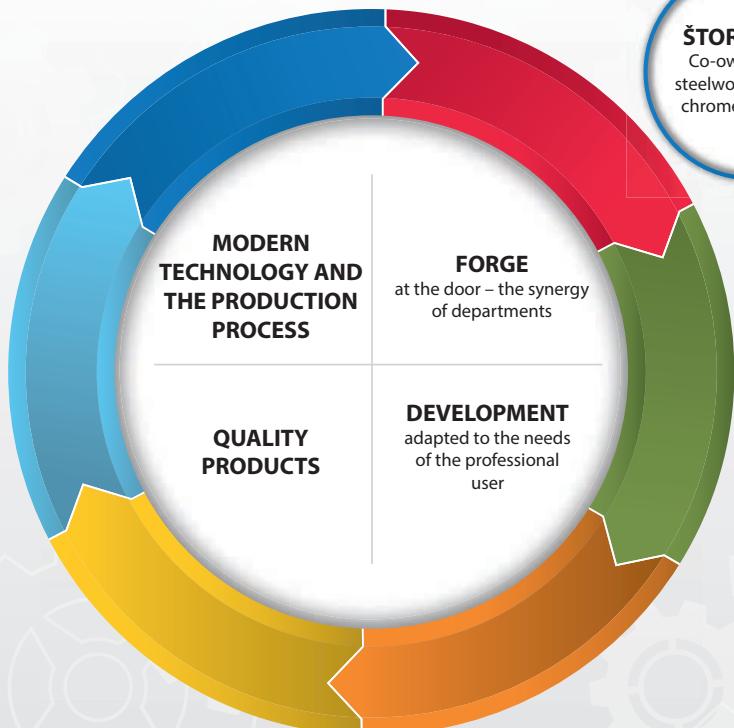

TOURISM

Unior, which operates in the shelter of the Pohorje mountain range, surrounded by an attractive landscape, is developing two interrelated tourist centres. The Rogla climatic health resort, Olympic centre and winter sports centre is especially interesting for professional athletes and recreational athletes, while the Terme Zreča spa is ideal for those seeking health and wellbeing. Both connected health resorts with their modern capabilities are an excellent choice for family holidays, health rehabilitation and preparation for top athletes.

HAND TOOLS

The development of Unior hand tools constantly follows the requirements of professional and amateur craftsmen all over the world. Top quality materials and original design solutions are the basis of the extreme practicality, effectiveness and long service life of more than 5,500 hand tools. The availability of tools is ensured by a multi branch distribution network. With its cold forged products, Unior is an important supplier of tools for the European industry.

PARTNERSHIP

Milestones of the Unior corporation

From Styria to the world

On the outskirts of the Pohorje Mountains, the first ironworks (foundries) were established in the 18th century. They operated as larger forges, in which land and tradesmen's tools were fashioned by hand.

In 1919 the Štajerska železoindustrijska družba (Styrian Iron Industry Company) forging plant, with the shortened name Štajerska Zrece, was established. It produced forged hand tools for farming, forestry and various other trades.

In 1950 the plant, burned down during the war and partially renovated in the years following the war and bearing the new name of Tovarna kovanega orodja Zrece (TKO) came under state ownership. New capacities (tool shop and hand tools mechanical processing plant) comprised the basis for developing two production lines: hand tools and drop forgings.

In the 1970s the plant equipped with a new development strategy also obtained a new name: Unior, tovarna kovanega orodja Zrece. The new name was formed from the words "Univerzalno Orodje" (Universal Tools), by which the company had been known for a long time.

In the mid-1970s Unior began building the Rogla climatic health resort and Olympic centre on Pohorje, and a few years later construction of the Terme Zrece spa commenced and with it, the Tourism Programme.

In 1997 this successful Slovenian company with stable international partnerships was transformed into the UNIOR, d. d. joint stock company. Already at that time, the company had been operating in accordance with ISO 9001 quality standards.

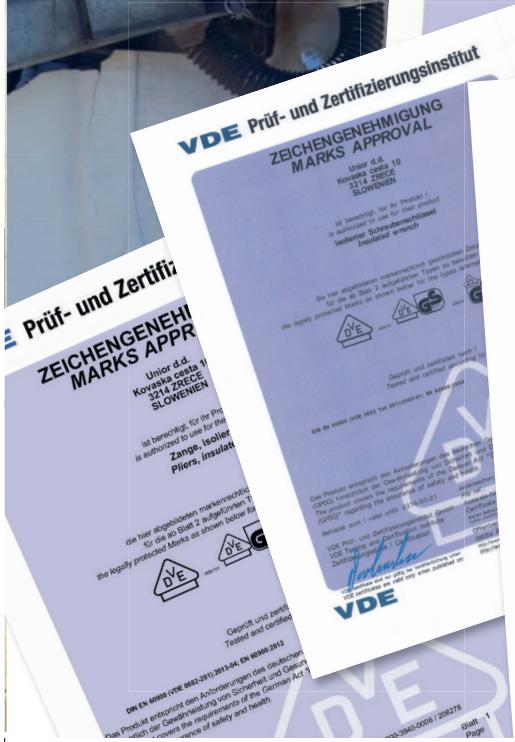

By the 1980s Unior had established its name as an important partner of the European automotive industry, namely as one of the largest European producers of light forgings and as one of the largest European producers of connecting rods for petrol engines. Initial development was enabled by a contract with the Renault concern, on the basis of which a joint-venture plant for the production of forgings was built in Zrece. At the same time, Unior developed its production of homokinetic joints and machine tools, initially intended for the company's own needs.

Unior Joint-Stock Company is today one of the largest and most important Slovenian exporters. With its five production segments company follows the tradition of a high quality and innovation. Committed to high utilization of own capacities, Unior enhances the brand awareness through more than 2400 employers and 32 group companies around the world.

INSULATED TOOLS

Ultimate protection

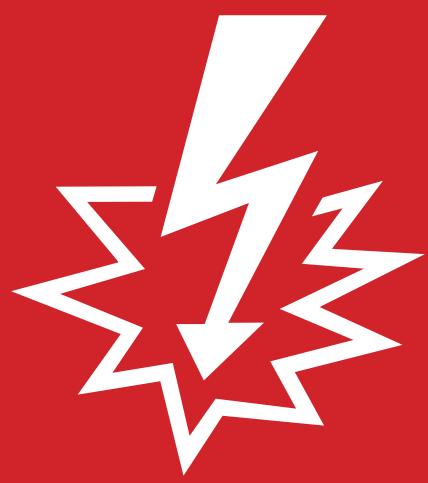

Unior insulated VDE tools ensure ultimate protection even when used around live circuits with up to a 1000-volt potential. The utility of all tools is thoroughly verified by means of the impact strength, electrical, flame-retardancy, insulation adhesion and stamp tests, with each tool being tested individually.

High-quality steel

Insulated wrenches, pliers, shears, screwdrivers and other tools for working with electrical and other power installations are made of high-quality tool steel with added protection, and designed for simple and safe use.

VDE regulations

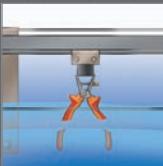

VDE insulated and tested according to the VDE regulations, Unior tools for work in electrically live environments meet the requirements of the internationally acknowledged European EN 60900 standard.

FLAME RETARDANCY TEST

The flame is applied to the test piece for 10 seconds. The test piece is acceptable if the height of the flame on the burning handle does not exceed 120 mm in an observation period of 20 seconds after the burner has been removed.

ELECTRICAL TEST (10KV)

Before testing the tools are immersed in a bath of water at 23 °C for 24 hours +- 5 hours. The test pieces are acceptable if there is no electrical discharge, spark over or flashover, and if the current leakage is less than 1mA for 20 mm insulation.

INSULATION TEST

Before testing the test piece is heated to 70 °C -/+ 2 °C for 168 hours. The hanger is loaded with weights (500 N). The duration of test is 3 minutes. The test piece is acceptable if the handle remains firmly attached to the conducting part.

STAMP TEST

The indenter is loaded with a weight of 20 N and is applied to the centre of the handle. The test is successful if the test piece subsequently passes the electrical test.

IMPACT TEST

The test is carried out at an temperature of - 20°C. The hammer is allowed to fall freely on the test piece 3 times. The test piece is acceptable if the handle is not cracked, broken or does not show signs of flaking.

Hand tools for live working up to 1000 V A.C.

Sign of the institution certifying the tools (VERBAND DEUTSCHER ELEKTROTECHNIKER).

A sign indicating that the tools are in accordance with the signed standard (DIN), which prescribes the basic demands for tools (dimension, hardness, mechanical testing etc.).

Features of Unior's pliers

VDE BI line

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles
- jet stamp UNIOR

VDE DP line

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- double layered insulation VDE tools, double safety
- establish wear of your VDE DP tools, just in time

Features of Unior's wrenches

Wrenches

- material: chrome vanadium

ORANGE AS A WARNING SIGN

The double plastic protection of the VDE tools ensures double safety, because it enables the recognition of worn out tools in due time. When the tool gets worn out, an orange colour appears (the second protection layer), which is a sign that the tool should be replaced immediately.

ERGONOMIC HANDLE!

The combination of hard and soft surface improves the load factor and ensures smooth screwing. The handle was developed in such a way that it takes care of the user's health because it reduces the tension of the hand muscle.

Large hand contact area
= more torque power

Ergonomic handle
design = protecting your
hand

110/2VDEDP**Insulated single open end wrench**

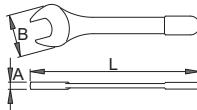

- material: chrome vanadium
- head: chrome plated according to EN12540
- made according to standard EN60900

Advantages:

- double layered - double coloured insulation for additional safety
- controlled with electrical test

Important!

- if second layer is visible, replace your VDE tool with a new one.

The first step to safe work

With the use of insulated ratchets and sockets VDE, you will forget all efforts and essentially improve the productivity of work. Because of its safety and simplicity, the high-quality tools will totally satisfy your expectations. A special feature is the lock system and mechanism for socket turnoff which enable faster use of the tool.

236/2HXVDEDP

Insulated hexagonal screwdriver socket 3/8"

- material: socket: chrome vanadium, chrome plated
- material: bit: special tool steel, anticorrosive oiled
- entirely hardened and tempered
- made according to standard EN60900

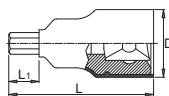

Advantages:

- double layered - double coloured insulation for additional safety
- controlled with electrical test

Important!

- if second layer is visible, replace your VDE tool with a new one.

One-handed use

With the universal pliers VDE you will be able to achieve an optimal transmission to the working platform without great effort. When clasping pipes and nuts, the pliers ensure a clean grip without any traction. With special anti-traction protection which stops your hands of directly touching the working platform and with that the possibility of finger injury during work is reduced. The adjustable jaw into 7 positions enables the jaws of the pliers to adapt to different types of work piece without changing the pliers.

A

Minimum effort – maximum transmission

The Diagonal cutting nippers VDE with its precise cutting edges offer exact and better cutting of wires with minimum effort and maximum transmission. Due to the reduced wearing out of cutting edges, the useful life of the pliers gets longer.

Minimum effort – maximum transmission

The Diagonal cutting nippers VDE with its precise cutting edges offer exact and better cutting of wires with minimum effort and maximum transmission. Due to the reduced wearing out of cutting edges, the useful life of the pliers gets longer.

Very precise and durable

Due to its universal use, ergonomic design and useful life of the product, Unior tries to satisfy the needs and wishes of the user. With the technology of creating a hand-friendly tool, work with less effort becomes much easier and effective. The pliers are very durable and precise when working with wires.

Quality in shape

The production of the VDE pliers is based on constant quality control. In each stage of production, the pliers are individually checked and tested to prevent the possibility of failures on the tools and increases safety during use. The advantage of long round nose pliers is its exact clenching, bending, and curving of wires and making slings.

TBI handles for screwdrivers are composed of three layers, namely:

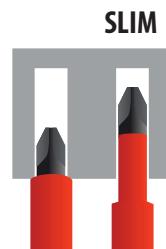

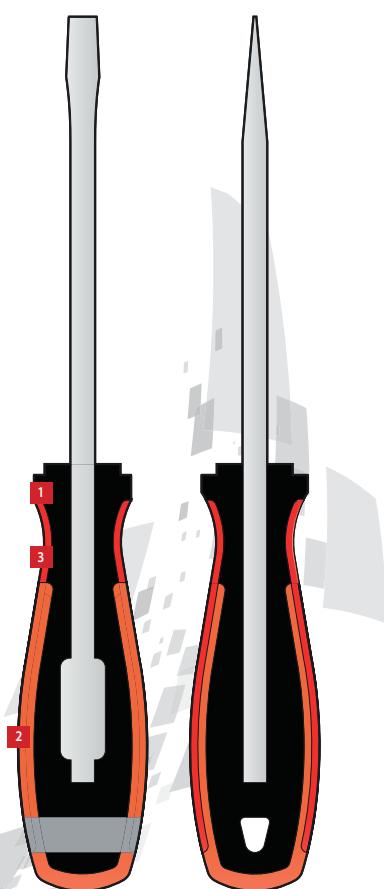

1. layer: black PP (polypropylene) which surrounds the stem of the screwdriver and is extremely solid, preventing the turning of the screwdriver stem in the handle at high torque
2. layer: orange PP (polypropylene) which surrounds the 1st layer of the handle is very stiff and ensures the constant shape of the handle under various environmental effects
3. layer: red TPE (thermoplastic elastomer) which partially surrounds the 2nd layer of the handle is a medium-strength material that gives the handle its final ergonomic shape, ensures a pleasant and non-slipping grip and thereby the achievement of high torques

Able to fit a variety of screw profiles and exhibiting innovative three-component handles, UNIOR screwdrivers ensure great efficiency and a slip-proof grip.

The screwdrivers are made of chrome-vanadium-molybdenum steel and are additionally chrome or nickel plated. The superior quality of materials used in the Unior line of screwdrivers is complemented by ergonomically designed handles to provide an excellent hold.

With its combination of soft and hard surfaces, the special, three-component handle – a Unior patent – ensures comfort and efficient performance with minimum strain on the wrist while working. The soft material ensures maximum grip even when oily.

Along with the varied consistency of the plastic handle practically eliminating the danger of the screwdriver slipping in the hand, the improved grip also ensures greater torque. This can also be achieved by inserting a rod in the perforation added with this purpose to all handles functioning also as a hanging hole for handier storage.

Tool sets for easier choice

The composition of various sets is based on continuous cooperation with local professional users of insulated VDE Unior tools. Sets prepared in advance follow the needs of individual activity. Special sets of VDE tools for users dealing with electrical voltage have also been produced. It is a high quality selection of inexpensive tools.

SOS tool tray

- We can produce SOS tool trays according to your needs and wishes
- Tell us your wishes and we will prepare an offer for you
- The trays are available with a thickness of 2, 3 and 4 cm
- In a blue/black colour combination
- Your tool carriage will never be untidy again
- The drawers only contain the tools that you need.
- 100% neatly organised
- You will immediately spot if something is missing.
- Quality design guarantees long-term use
- For extra-demanding work

CABLE CUTTING, STRIPPING AND CRIMPING TOOLS

Ergonomic handles

With ergonomic handles and a specially designed grip, surface Unior pliers provide maximum comfort at work and high efficiency with minimum strain.

Surface protection

The pliers are made of excellent steel with special improved composition. Several models come with additional chrome surface protection.

High precision

With their perfect design and technological superiority, Unior pliers ensure a high precision hold in any instance of general or dedicated use.

380

**Wire stripper**

- material: polyamide

Advantages:

- adjustable length stop of 5-12 mm
- easily accessible built - in side cutter for max. 2mm

Usage

- fully insulated automatic wire stripper for all common stranded and solid conductors of 0,2-6mm²

| Barcode | Ø | L | W | H |
|---------|---------|-----|----|----|
| 610925 | 0.2 - 6 | 117 | 1E | 10 |

385H

Cable stripper with hook knife

- material: polyamide

Advantages:

- no damage of the inner conductors can occur due to infinitely variable adjustment of the cutting depth
- the swivel blade automatically turn from circular to longitudinal cut

Usage

- accurate, fast and safe stripping of all common round cables of 4-28 mm²

| Barcode | Ø | L | W | H |
|---------|--------|----|----|----|
| 610930 | 4 - 28 | 91 | 1E | 10 |

385.1H**Blade for 385H**

| | | | | |
|--------|----|--|----|----|
| | | | | |
| 623377 | 20 | | 1E | 10 |

385G**Cable stripper with straight knife**

- material: polyamide

Advantages:

- no damage of the inner conductors can occur due to infinitely variable adjustment of the cutting depth
- the swivel blade automatically turn from circular to longitudinal cut

Usage

- accurate, fast and safe stripping of all common round cables of 4-28 mm²

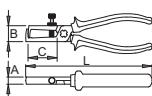

| | | | | |
|--------|--------|----|----|----|
| | | | | |
| 610931 | 4 - 28 | 92 | 1E | 10 |

478/1BI**Wire stripping pliers**

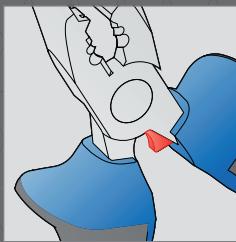

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles

Advantages:

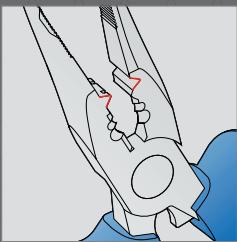

- spring for reopening
- stripping capacity: up to max 0.6 - 10mm²

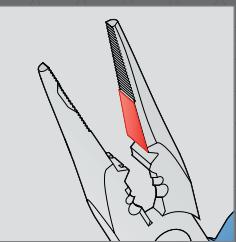

| | | | | | | | | |
|--------|-----|--------|----|---|----|-----|----|----|
| | L | | B | A | C | | | |
| 607882 | 160 | 0.6-10 | 18 | 9 | 40 | 178 | 4B | 10 |

514/1BI

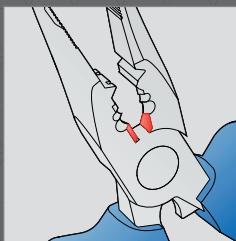

Crimping cable terminals up to Ø 4.0 mm.

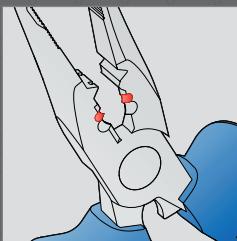

The pliers can be used for crimping insulated spade terminals.

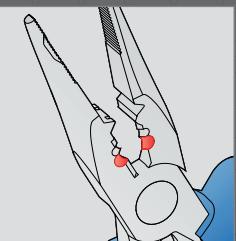

The ground part of the jaw is intended for gripping objects with sensitive surfaces.

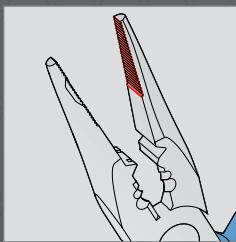

Cutting wires from Ø 2.2 mm to Ø 4.0 mm.

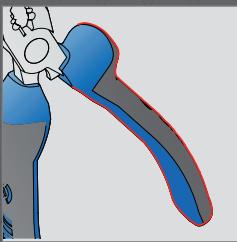

Stripping off insulations from Ø 2.2 mm to Ø 3.0 mm.

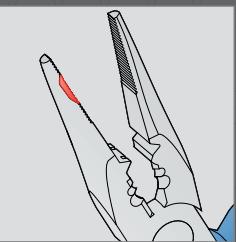

Stripping off insulations from Ø 3.5 mm to Ø 4.0 mm.

Multi-toothed jaw prevents slipping and enables a better grip of cables, wires etc.

heavy duty double - component handles

Winding hard wire and bending rings up to Ø 3.5 mm. Rings can be bent to the right or to the left, since the tool has appropriate teeth on both sides of the jaw.

514/1BI

Multifunctional electricians pliers

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- head polished
- surface finish: chrome plated to standard EN12540
- heavy duty double - component handles

Advantages:

- 7 different functions
- multi-toothed jaw
- ergonomically shaped handle
- extra strong grip
- Extra strong grip - the design and shape of the handles give the hand more leverage during use, enabling more stability and safer transmission of force.
- high durability
- Multi-toothed jaw prevents slipping and enables a better grip of cables, wires etc.

Usage

- Winding hard wire and bending rings up to Ø 3.5 mm. Rings can be bent to the right or to the left, since the tool has appropriate teeth on both sides of the jaw.
- The ground part of the jaw is intended for gripping objects with sensitive surfaces.
- The pliers can be used for crimping insulated spade terminals.
- Stripping off insulations from Ø 2.2 mm to Ø 3.0 mm.
- Stripping off insulations from Ø 3.5 mm to Ø 4.0 mm.
- Cutting wires from Ø 2.2 mm to Ø 4.0 mm.
- Crimping cable terminals up to Ø 4.0 mm.

B

427/4AG

427/4AG

Crimp grip pliers

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles

Advantages:

- strong metal crimping profile with electrical plating
- reinforced connecting spring for longer usage life
- square crimping performs a better contact than traditional crimping profile

Usage

- for cord end sleeves 0,08 - 10mm²/AWG28 - 7

| | | | |
|--------|-----|----|---|
| | | | |
| 621550 | 433 | 1G | 1 |

427/4CG**Crimp grip pliers**

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles

Advantages:

- special designed clamping jaws hold the wire securely during the stripping process

Usage

- swivel knob micro-adjusts for thinner wire to 30AWG (0.05mm^2) or thicker wire to 8AWG (8mm^2)
- crimp non-insulated terminals 10-22AWG (1.5 to 6.0mm^2)
- crimp insulated terminals 10-22AWG (1.5 to 6.0mm^2)
- crimp auto ignition terminals 7 to 8mm

| 621552 | 378 | 1G | 1 |
|--------|-----|----|---|

427/4DG**Modular crimping pliers**

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles

Advantages:

- exact crimping process due to parallel crimping

Usage

- for crimping 6- and 8-pole Western plugs type RJ 11/12 (9.65 mm width) and type RJ 45 (11.68 mm width)
- tool for cutting and stripping unshielded ribbon telephone cables
- with additional stripping device for round cables
- with length cutter and dismantling knife for ribbon cables 6 and 12 mm width

| 621553 | 401 | 1G | 1 |
|--------|-----|----|---|

427/2FG

Crimp grip pliers

- material: sheet metal
- jaws hardened to 38-40HRC
- very easy to handle

Advantages:

- hexagon crimping
- the respective cross-section is set by rotating profile disks
- Dented 6-position rotating dies 6, 10, 16, 25, 35, 50mm²
- lever transmission permits light force transfer

Usage

| | | | | |
|--------|--------|------|----|---|
| | | | | |
| 621555 | 6 - 50 | 1350 | 1D | 1 |

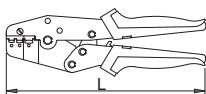

428/4

Crimp lever pliers

- material: sheet metal
- jaws drop forged from special tool steel, entirely hardened and tempered
- toggle joint ensures high compression pressure with little effort
- heavy duty plastic handles
- re-changeable head-spare part
- surface finish: phosphated to standard DIN 12476

Usage

- for insulated terminals (0,5-6mm²)

| | | | | | |
|--------|---------|-----|-----|----|---|
| | | L | | | |
| 602327 | 0.5 - 6 | 240 | 575 | 1E | 1 |

- spare head

| | | | |
|--------|-----|----|---|
| | | | |
| 602328 | 161 | 1E | 1 |

428/4AGPB**Set of grip crimp pliers with exchangeble jaws in plastic box**

- material: sheet metal
- surface finish: phosphated to standard DIN 12476
- heavy duty double - component handles
- Dimension of box: 307 x 260 x 55

Advantages:

- ratchet crimp system ensures reliable work
- quick changing system for 4 different types of jaws

Usage

- for insulated terminals AWG10-12/14-16/18-22 (4-6/1.5-2.5/0.5-1.0mm²)
- for non-insulated terminals AWG14-6 (0.2-16mm²)
- for cord end terminals AWG22-6 (0.5-16mm²)
- for BNC/TNC coax conectors RG-58, RG-59/62. Hex connectors 0.255 (6.48mm²), 0.213 (5.41mm²), 0.068 (1.73mm²)

TOOLS FOR ELECTRONIC

Precision

Tools for electronic use are distinguished by precision of manufacture and excellent functionality, which guarantees a complete match with the object being worked on, even in hard to access places.

Effectiveness

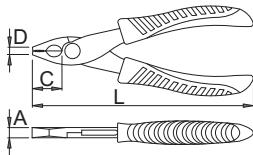

The tool provides several functions, such as cutting, removing and pressing cables, which makes work faster and without additional physical strain.

406/4E

Electronic combination pliers

- material: special tool steel
- drop forged, entirely hardened and tempered
- cutting edges induction hardened
- heavy duty double - component handles

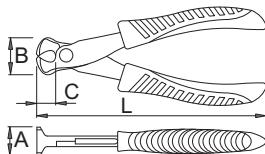

| Barcode | L | B | C | A | | | |
