

Product Information – R230DCT EU

230mm (9") Electric Disc Cutter with Diamond Blade

Product Code: 009-0003

Barcode: 0849713087249

Bullet Points:

- Safer & more practical cutting vs a grinder
- Market leading cut depth of 90mm**
- Ergonomic design to improve user posture
- Powerful 2000w motor*
- 230mm Diamond Blade Included
- Wheeled skid plate
- 3m heavy-duty cable
- Power Protect Technology for longer tool life
- Soft start & blade brake
- 3 Year Guarantee

Description:

Put the grinder down and get the right tools for the job. The all new Evolution R230DCT has up to 50% more cutting depth than a 230mm / 9" grinder and it even comes with a diamond blade included! With an impressive 90mm cutting depth, this is the ideal cut off saw for concrete, reinforced concrete, natural stone, brick, roof tile & more. It's easy to use thanks to its ergonomic design with wrap-around front handle & even weight distribution which gives you total control and good posture while cutting. It comes packed with a powerful 2000w* motor for effortless cutting and it utilises our Power Protect technology which protects internal components from dust and water ingress. The wheeled skid-plate takes the strain out of long, low level cutting and also allows you to put the machine down while the blade is still spinning. All that plus blade brake & large blade guard for improved safety, integrated dust port for easy vacuum attachment, multi-tool with onboard storage for easy blade changes & more. Try it for yourself!

* 230v only, 110v is 1600W.

** Best cut depth of a 230mm/9" blade machine. Correct at the time of writing.

Box Contains:

1 x R230DCT Disc Cutter

1 x 230mm/9" Diamond Blade

1 x Multi-tool

1 x Instruction Manual

Specification:

Power: 230v 2000w

Speed no load: 6000rpm
